

KELLYN LABRADORS
GREG AND TRICIA LYNCH
10131 WEST ASBURY AVENUE
LAKEWOOD, CO 80227
(303) 914-8687

Your Labrador Retriever has been bred from temperamentally sound parents who have been certified to be free of hip dysplasia and inherited eye defects. Both parents have also been tested for the genes which produces Progressive Retinal Atrophy (PRA) and Exercise Induced Collapse (EIC) and have been found to be clear. Finally, both parents have been certified as clear of Tricuspid Valve Disease (TVD) by a Board Certified Veterinary Cardiologist. Copies of all of these clearances are provided as part of your puppy packet. Your puppy has been examined by a veterinarian, and has been inoculated at six weeks of age with the appropriate vaccinations. Your puppy has been implanted with a microchip to aid in recovery in case he/she is ever lost or stolen. Your puppy has also been routinely treated for roundworms at 2 weeks of age and again at 4 and 6 weeks. We will advise you of any continuing treatment that may be required.

GUARANTEE

It is understood that, at the time of sale, this puppy has been evaluated by the breeder with respect to other representatives of the breed at approximately the same age and has been determined to be structurally and temperamentally suited to be a companion, hunting, and/or obedience dog. *This does not necessarily imply that the dog is of breeding or show quality.* This puppy is guaranteed to be healthy upon delivery to the buyer, and a full refund will be given for any puppy found to be unhealthy provided the following is met:

The puppy must be examined by a veterinarian of the buyer's choice within three days. If the puppy is found to be ill, the breeder is to be notified within 24 hours and a refund of the purchase price will follow the return of the puppy and all papers to the breeder, including a written statement from the attending veterinarian stating the dog's condition.

The buyer shall maintain the puppy's schedule of inoculations and shall initiate heartworm prevention according to the schedule recommended by their veterinarian. The first set of "puppy shots" was administered on November 2, 2016 and you have been provided with a puppy health record from the attending veterinarian. Our vet suggests additional "booster" shots at 10 weeks, and 14 weeks with a final rabies shot at 18 weeks. **We urge you to discuss with your vet the vaccination protocol that they prefer.**

No other health guarantee is given except in the case of a hereditary defect that develops to the extent that it renders the dog unsuitable as a pet within two years of the date of this sale. In this instance, a replacement will be given as soon as one is available, or a refund of 50% of the purchase price will be given at the breeder's option. *If the dog has been bred without the breeder's written consent or is over the age of 24 months this agreement is voided.* It is not necessary to return the dog to collect on this agreement; however, the dog must be neutered or spayed with proof of same provided to us in writing from your veterinarian.

If the dog is used heavily for field trials, open obedience, hunting, or any other strenuous activity (including "roading") prior to being one year of age, environmentally induced hip and/or elbow dysplasia may result. If these factors occur, it is left to our discretion to honor this agreement. The buyer should also educate himself to proper nutrition of the dog so as not to induce joint problems by either lack of nutrition or by causing an overweight condition in a developing dog.

BREEDING, SPAY/NEUTER, AND REGISTRATION STATUS:

In the interests of protecting the Labrador breed and not contributing unnecessarily to the problem of pet overpopulation, Kellyn Labradors sells all puppies on AKC Limited Registration. AKC Limited Registration means that the dog *is AKC Registered* but no litters produced by the dog are eligible for AKC Registration. Dogs with Limited Registration may *not* be entered in breed competition at Dog Shows but may compete in all other AKC events. Under AKC rules, the breeder of a puppy (and only the breeder), may later apply to change this designation and have the dog given Full Registration privileges, but a fee and special

application are required by the AKC for this change. Kellyn Labradors agrees to apply to change this designation to Full Registration at the buyer's request upon the receipt of a written statement from a licensed veterinarian that this dog has been spayed/neutered. Lifting of the Limited Registration status for breeding or show purposes can be discussed separately with us if desired.

SPECIAL PROVISION ON EARLY SPAY/NEUTER:

You might be encouraged by your veterinarian to spay or neuter your puppy at an early age - some as early as four months. You have been provided with articles and information which describe the negative impact of early spay/neuter on the long term health of your puppy. While we fully support spay/neuter as a means of preventing pet over-population, we STRONGLY discourage the practice of EARLY spay/neuter. Ultimately, the decision is yours. However, as a means of discouraging this practice, the 24 MONTH GUARANTEE EXPRESSED ELSEWHERE IN THIS DOCUMENT IS EXTENDED FOR AN ADDITIONAL 12 MONTHS IF:

- **Males are neutered AFTER 16 months of age**
- **Females are spayed AFTER 14 month of age (or AFTER the first season, whichever is later).**

RETURN AGREEMENT:

The buyer agrees to contact the Kellyn Labradors immediately if he/she decides not to keep this Labrador Retriever for any reason. Buyer will not sell, give away, or otherwise dispose of this dog (including to other family members who have not been screened by us) without first contacting Kellyn Labradors. Kellyn Labradors agrees to either accept the dog on a return basis or assist the buyer in finding a suitable alternative home for the dog. This does not imply a financial commitment on the part of Kellyn Labradors.

OTHER PROVISIONS:

The buyer agrees to provide a suitable environment for this dog and will not allow it to run loose in an unsupervised situation. The buyer agrees to not leave this dog in a car in hot temperatures without adequate ventilation and shade, or allow it to be transported in the back of an open vehicle without being confined in a kennel crate meeting airline transportation requirements.

The buyer agrees to keep this dog current on the required immunizations and heartworm prevention as deemed appropriate by their veterinarian (practices vary from region to region of the country).

This agreement pertains to one Labrador Retriever Male / Female (circle one) whelped September 19, 2016.
